Date: 14th January, 2021.

MOVEMENT CONTROL ORDER (MCO).

Dear SCI Employee:

As you know the Government has announced another Movement Control Order effective from **13th January 2021**.

We have updated our International Trade and Industry Ministry (MITI) permit to continue to operate as an 'Essential Service'. The **Factory's at Rasa, Kuantan & Kluang** will comply with the Government's SOP and regulations & maintain production & shipments.

Heads of Department at the **MBMR Office** are required to update the job rotation listing and submit to the HR Department.

Please be reminded that staff who work from home must be working and contactable during regular office hours. Response on work related matters is required throughout the period.

Our ability to answer customer enquiries & supply materials will not be impacted. We will continue to accept purchase orders, submit approvals, provide designs & ship product to all Regions & States.

The health & well-being of our employees & their families is paramount & we will continue to do our part to flatten the curve of Covid-19 cases in Malaysia.

The SCI Leadership Team remains completely focused on managing our Company through this challenging period & will position the business for a rapid & strong recovery.

Company updates will continue to be circulated by e-mail & are also available on our LinkedIn page & the SCI Website.

Thank you for your support.

David Plummer.

Chief Executive Officer.
